December 2021

About the Project

"EduStorytelling" (EST) aims at addressing the digital skills and literacy gap affecting European adults coming from disadvantaged backgrounds through the methodology of Digital Storytelling (DST) as a pathway to develop high-quality digital and literacy skills and competencies. It will improve attitudes of peer-interaction and cooperative learning, forming part of a comprehensive digital literacy in order to foster personal development, active citizenship and employability perspectives.

Updates and news on the project

First, the Newsletter give an insight about the IO1 done. The Training Handbook is designed as a tool to enhance digital skills of adult education trainers working with adults with a disadvantaged background.

Second, give more information about the JSTE, which took place from 26.07.2021 – 03.08.2021 in Stintino, Italy. The activities included: team building activity so that the participants would start to open up to the group and feel welcomed, ice-breaking games, energizer , coach-led tournament, workshops, and finally evaluation and impact assessment of digital storytelling. The methodology used in these activities was that of non-formal education and digital storytelling!

Finally, the Newsletter tels more about the IO2 - DigiStory Guide.
MVI introduced the contents of the IO2, that will be implemented after the mobility that will take place in spring 2021 to produce the DigiStories Guide. In the meantime, MVI supervised by Autocreacja will draft a structure of the Guide. This way, once all the info from the mobility will be collected it will be easier and faster to create the content of the guide, leading to an end of the IO2 by June 2021.
In the next meeting, partners will also lay the basics for the development of the IO3, according to the COVID-19 situation partners will try to select a possible date for the mobility to take place.
